TABLE OF CONTENTS

Infor M3 PRODUCTS – Compatibility Overview

Using the Compatibility and Availability Overview

M3 Product Compatibility and availability Overview describes the following information on product releases:
Compatibility:
- ► Product offering release information
  - – Product Offering Release name & version (i.e. complete M3 offering for each M3 Business Engine version, such as "M3 13.1" etc.)
- ► Related Infor products information
  - – Product name & compatible versions of related Infor products (software components), third party products and middleware for each M3 offering

Availability:
- ► Available language translations for each product (software component) (the current version for each offering)
- ► Available Country Versions for M3 Business Engine for each offering
- ► Available platforms for each product (software component) (the current version for each offering).

For more information of the compatibility or availability of a specific product, please refer to the Release Notes or Installation Guide document of that product (software component version).

Updates in each revision of this document are marked with <mark>yellow highlight</mark>. Brief change log for this document is found in Appendix C.

Interpreting Contents of Cells in the Compatibility Overview

- When a cell indicates major version.minor version. with service pack 'x' (such as 13.1.1.x): that means it is supported from the first service pack level (13.1.1.0) and continues through the current service pack.
- When a cell indicates major.minor.service pack (such as 13.1.1.1): that means it is supported with the indicated service pack (such as 13.1.1.1) only.
- When a cell indicates from major.minor.service pack to major.minor.service pack (such as 13.1.1.2 – 13.1.1.3), that means it is supported only during the indicated service pack range and is last available in the ending service pack.
- When a cell indicates major.minor.service pack with double dash (such as 13.1.1.2 --), that means it is supported from that service pack level and on all later service pack levels for that release.
- When text is ~~struck-through~~, it means that the information will be deleted from next revision of this document.

1) See Appendix A: Restrictions
2) Infor does not deliver any layouts to StreamServe 5.6.1. Business Engine corrections might be delivered with StreamServe layouts in another format and require manual implementation (with the help of Infor Consulting Services or other party). Customers choosing to run StreamServe 5.6.1 will need to upgrade the latest delivered layouts for StreamServe 5.6 to StreamServe 5.6.1 format at own expense.
3) For details of each Software Component, please refer to Installation Guide and Release Notes document
4) Physical delivery from IBM – Key instructions/license from Infor M3
5) For M3 BE and core technology products, Windows 2008 R2 is supported only for existing customers already running M3 10.1 (to provide a convenient upgrade path). Please note LCM 10.x requires Windows 2012. New installations on M3 13.1 must choose Windows 2012.

Appendix A –Restrictions

A01. IBM Websphere Application Server Network Deployment (WAS ND)

Allows the use of the J2EE application server and web services content, to be used in conjunction with Infor M3 Product Suites only, subject to the following restrictions:

– Deployment Manager is restricted to manage processes or JVM's on a single production machine.
– Workload management is restricted to a single production machine.
– Use of the High Availability Manager and use of clustering over more than one machine are restricted.

A02. IBM WebSphere Enterprise Service Bus

– WebSphere Enterprise Service Bus is available on Windows platform only.
– WebSphere Enterprise Service Bus is limited to a single production machine deployment environment for use in connections (1) between Infor M3 applications, and (2) between Infor M3 applications and Non-Infor M3 applications in the Infor M3 applications and business process. Use for connections between two Non-Infor M3 applications is not permitted outside of the Infor M3 applications and business processes.
– Use of the WebSphere Application Server ND Program in WebSphere ESB is restricted to use as defined above.

A03. IBM WebSphere MQ

– WebSphere MQ is available on Windows platform only.
– WebSphere MQ is limited to a single production machine deployment environment for use in connections (1) between Infor M3 applications, and (2) between Infor M3 applications and Non-Infor M3 applications in the Infor M3 applications and business process. Use for connections between two Non-Infor M3 applications is not permitted outside of the Infor M3 applications and business processes.
– For all WebSphere MQ interactions MQ must be directly connected to the WebSphere ESB.

A04. Additional IBM Products for Traceability on System i Only

On the System i platform only, the Infor M3 System Foundation (MSF) license grants you the ability to obtain a permanent key to utilize the following two IBM Products with Infor M3 Product suites only *:

PRODUCT NAME	PRODUCT NUMBER	FEATURE or CODE.ID	VERSION / RELEASE
WebSphere Development Studio ** (Compiler - ILE C)	5722-WDS	51	v5r4
	5761-WDS	51	v6r1
DB2 Query Manager and SQL Development Kit	5722-ST1		v5r4
	5761-ST1		v6r1

* These IBM Products are shipped on CDs/DVDs with the System i box. Questions regarding the software delivery/availability should be directed to IBM. All other questions should be directed to Infor M3. These IBM Products may be used for a 70-day trial period before a permanent key is required.
** **Important Note - Restriction:** The only server component of WebSphere Development Studio that is licensed for use is the ILE C server component.

A05. IBM DB2 Content Manager Enterprise Edition Program

- ‣ For use with Infor M3 Product Suites only
- ‣ License to DB2 Content Manager Enterprise Edition Program entitles:
  - – Install, from the program package, the program server to support your licensed DB2 Content Manager Enterprise Authorized Users.
- ‣ License does not entitle use of:
  - – DB2 Content Manager OnDemand,
  - – DB2 Content Manager VideoCharger and
  - – Tivoli Storage Manager which are in this Program.

User Definitions/Restrictions:
- ‣ View/read only user: Restricted to a Maximum of 3 views/reads per day
- ‣ Full use user: Full functionality and/or More than 3 views/reads per day

A06. IBM WebSphere Transformation Extender

- • For use with Infor M3 Product Suites only
- • Use of the WebSphere Transformation Extender is restricted to individual point to point connections from/to Infor M3 Applications and Non-Infor M3 Applications, and Infor M3-to-Infor M3 connections.

A07. Virtualization & Hardware Support Statement

- ‣ Infor supports Infor M3 Products on stated Operating Systems; this includes Operating Systems on virtualized hardware.

Clarifications:
- ‣ Stated Operating systems may be run on the physical or virtualized hardware of your choice. Infor will not make statements about specific hardware or virtualization technologies required for use in order to receive support unless a particular Infor M3 Product requires such a statement. The hardware and/or virtualization technologies that your company employs should be based on your own experience, knowledge and expertise.
- ‣ Per Infor M3 Global Support procedures, if Infor suspects that a reported product issue is related to a third-party product not directly supported by Infor (e.g. hardware, Microsoft SQL Server, VMware, operating system, etc.), you may be required to work directly with the third-party vendor to resolve issues. You may also be required to modify your Infor M3 environment in order to target the root cause of the reported issue.

Stated Operating Systems are noted (high level) in this Compatibility Overview and in the Installation Guides for a specific product.
